

Environmental Management

As a responsible member of society, JSW regards operating in harmony with the environment as an important corporate responsibility. In our pursuit of production activities and environmental technologies that respect environmental integrity, we engage in business activities that contribute to the ecologically sustainable development of society.

Action Plan

1. We aim to carry out environmental tasks in an organized way, and to implement environmental preservation activities continuously.
 2. We will set appropriate objectives and targets for reducing the burden our activities impose on the environment with conserving biodiversity.
 3. We aim to provide society with products and services that contribute to the preservation of the environment.
- (1) We endeavor to increase the social value of our products in terms of environmental protection, safety and hygiene.
- (2) We will provide products and services that reduce environmental loads by obtaining a clear grasp of environmental needs and developing technologies.

Common Policy for Business Facilities

Taking into consideration respective business activities, local communities and the surrounding environments, each plant operates by setting out its own environmental policy, objectives and targets, drawing on methods compliant with international standards. Toward such ends, JSW plants continually strive:

1. To respect laws and regulations and agreements we have concluded with external parties
2. To prevent pollution and reduce and appropriately treat waste, and to conserve the ecosystem
3. To improve “resource productivity” through implementation of energy efficiency, resource efficiency, and recycling
4. To inform employees and other companies residing within our facilities of our policies and require their cooperation

Environmental Management Structure

The Environmental Management Committee, headed by the director in charge of environmental management, determines matters such as annual environmental management policies and programs of environmental activities for the whole company. Each plant has its own Environmental Supervisory Committee, which promotes environmental management activities and works hand in hand with other Group companies including affiliates to reduce the environmental impact of the Company’s activities.

ISO 14001 Certification Progress

The Muroran, Hiroshima, and Yokohama plants and Group companies Meiki Co., Ltd. and Fine Crystal Precision (S.Z.) Co., Ltd. have obtained certification under ISO 14001, an international standard for environmental management systems.

We leverage third-party certification bodies and

internal inspections to conduct checks at least once annually to ensure that ISO 14001-certified business sites are endeavoring to maintain and improve their environmental management systems.

The Company and Group companies have adhered strictly to laws and ordinances, and there were again no violations in fiscal 2014.

ISO 14001 Certifications of Business Sites

Business Site	Certification Date	Current Certification Body
Muroran Plant	December 18, 1998	Lloyd's Register Quality Assurance
Hiroshima Plant	December 18, 1998	Japan Quality Assurance Organization
Yokohama Plant	September 4, 2006	Lloyd's Register Quality Assurance
Meiki Co., Ltd.	March 4, 2005	ASR International Corporation
Fine Crystal Precision (S.Z.) Co., Ltd.	March 7, 2007	Intertek

Social Initiatives

Activities as a corporate citizen

Seeking harmonious coexistence with local communities, each of our manufacturing plants gives notifications about specific equipment related to pollution while measuring and analyzing waste on a regular basis. With respect to environmental standards determined by the Basic Environment Act, we notify government agencies of our measurement findings and conduct on-the-spot and voluntary inspections to confirm that the appropriate standards are in place.

Neighborhood cleanup activities

Since 2003, the Hiroshima Plant has conducted cleanup operations of local surroundings twice a year, in spring and autumn. We have now completed 22 such operations over the past 12 years. In 2015, the 13th year of the cleanup campaign, we are targeting environmental protection activities as a member of the local community.

Meanwhile, the Yokohama Plant, under its social contribution efforts, includes beautification of local streets as part of its education program for new employees. Twice a year, all Yokohama Plant employees also engage in

beautification activities inside and outside the facility. In addition to collecting waste outside the premises, we combat weeds and otherwise emphasize

proper greenery maintenance within the plant grounds. Collected waste is separated and appropriately discarded. We will continue these activities in the future.

Yokohama Plant's Environmental Activities Introduced in Report

Topics

The environmental activities of the JSW Group's Yokohama Plant are introduced in the "Member Company Environmental Protection Activities" section of the fiscal 2014 edition of "Environmental Activity Report," published by the Environmental Committee of the Japan Society of Industrial Machinery Manufacturers (JSIM).
